FD 20-35mm f3.5L

Canon Lens FD 20-35mm f3.5L

Canon breaks new ground with an incredible super wide-angle zoom lens designed for professional use. An advanced aspherical surface on the front element of the lens all but eliminates distortion at 20mm focal length, putting it on a par with a fixed focal length lens for extraordinarily high performance. With focusing from approximately 20 inches to infinity and a continuous maximum aperture of f3.5, this lens provides extraordinary creative flexibility.

SPECIFICATIONS:

Type: Wide-angle zoom
Construction: 11 elements in 11 groups
Angle of View: 94°-63°
Minimum Aperture: f22
Closest Focusing Distance: 0.5m (1.75') Magnification ratio: 0.083x
Filter Size: 72mm
Lens Hood: BW-72 (C44-7231)
Length: 84.2mm (3.37")
Weight: 470g (16.5 oz.)
Cap: C-72 (CG2-0073)
Case: LHC-13 (C47-0921), LSB-13 (C47-0955)
Function: Auto aperture, full aperture metering (AE operation with all Canon automatic SLR cameras)
Coating: Super Spectra
